Education

RVS College of Engineering and Technology , Bachelor of Technology in Computer Science and Engineering – Jamshedpur, Jharkhand	Jan 2022 – Jan 2026
• GPA/Marks: 8.47	
Karim City College , Higher Secondary School in Science – Jamshedpur, Jharkhand	Jan 2020 – Jan 2022
• GPA/Marks: 83.80	

Experience

Full Stack Developer Intern , Nishmira Technology Pvt. Ltd. – Remote	Jan 2025 – Jan 2025
- Contributed to GeoAsset, a location-based asset management app developed with Angular and Ionic. - Integrated Dexie.js for robust offline access, enabling data sync even in 90%+ low-connectivity test scenarios and cutting dependency on backend APIs by 40%. - Built 10+ reusable UI components and implemented interactive asset tracking features, improving maintenance efficiency and cutting future dev time by 25%.	
Machine Learning Intern , Ardent Computech Pvt. Ltd – Remote	Jan 2025 – Jan 2025
- Worked with 5+ real-world datasets, applying supervised and unsupervised learning algorithms like KNN, SVM, K-Means, and Decision Trees for pattern recognition and prediction tasks. - Designed and prepared a resume screening system using TF-IDF vectorization, achieving 85%+ accuracy in matching resumes to job descriptions based on relevant skills and keywords. - Used Generative AI to deliver actionable resume insights, helping users improve keyword alignment and boosting resume scores by 25% on average.	

Projects

Auto-Research Agent (Multi-Agent AI Research Assistant)

- Developed a multi-agent AI research platform that automates research paper ingestion, summarization, insight extraction, and semantic search, reducing manual literature review time by up to 80%.
- Built a Retrieval-Augmented Generation (RAG) pipeline using LangChain, ChromaDB, and Sentence Transformers, enabling context-aware querying of research papers through vector embeddings and semantic retrieval.
- Integrated Angular, Node.js, FastAPI, Ollama, and n8n to automate research paper processing, enabling an end-to-end AI-powered research assistant with seamless workflow orchestration

Penndora (AI Powered Blogging Platform)

- Created a blogging platform with AI-driven writing support using the Gemini API, serving over 100+ users.
- Enhanced user engagement by 40% through real-time grammar suggestions, post summaries, title generation, and content research powered by AI.
- Integrated secure session-based login with Firebase Auth and launched the app as a responsive PWA via Firebase Hosting and Render, ensuring 99.9% uptime and zero unauthorized access.

Skills

Languages & Web: C, Java, Python, HTML, CSS, JavaScript, Angular, Ionic, TypeScript, Node.js, Express.js

Databases & Tools: SQL (MySQL), MongoDB, Firebase, Git, Docker, AWS
